## ACCOUNTING FOR OVERHEAD

## SECTION :-2C

The following are some of common bases used for primary distribution overhead in a manufacturing concern

| Items of production overhead | Basis of distribution |
| :--- | :--- |
| Depreciation of plant and machinery | Capital value of the asset |
| Repairs to machinery | Same as above |
| Insurance of plant and machinery | Same as above |
| Rent, rates and taxes of factory premises | Floor area occupied |
| Power/motive power | Kilowatt or horse power of machine |
| Insurance of stock | Average value of stock |
| Insurance and rent of factory building | Floor area occupied |
| Canteen expenses , welfare expenses of <br> employees, ESI contribution, payroll expenses, <br> fringe benefit to workers, supervision charges <br> etc | Number of workers or direct wages |
| Audit fees | Sales |
| Indirect materials | Direct Materials |
| Indirect Wages | Direct Wages |
| Sundry Expenses | Direct wages or working hours |

The various bases commonly used for the distribution of service department

| Costs of service department | Bases of redistribution |
| :--- | :--- |
| Repairs and maintenance | Hours worked (Asset value * hours worked) |
| Canteen | Number of workers |
| Stores | Value or quantity of stores issued |
| Power house | Heat area or cubic content |

## Absorption of overhead

After the re distribution of service department costs to the production department the overhead of a production department will consists of:
a) Its own overhead
b) Shares of common overhead
c) Share of overhead of the services departments redistributed to it.

## COST AND MANAGEMENT ACCOUNTING -1 <br> SEMESTER 2 <br> CBCS (H) <br> OVERHEAD ACCOUNTING <br> SECTION :2C <br> TEACHER: Prof Sunita Saha )SS

Aggregate of $a, b, c$ above for all the production departments will exactly equal the total factory overhead for the period under consideration. The total overhead of production departments is to be borne by all the costs units relating to the respective production department. This is known as overhead recovery.

Three methods are considered:
a) Production Unit Method
b) Percentage Method
c) Hourly Method
a) Production Unit method:

Actual overhead to be absorbed/ Number of cost unit produced
b) Percentage method:
i) Percentage on direct labor $=$ Actual production overhead/ actual direct material costs* 100
ii) Percentage of direct wages $=$ Actual production overhead/ Actual direct wages*100
iii) Percentage on prime costs= Actual production overhead/ Actual prime costs*100
c) Hourly rate method
i) Machine Hour Rate:- Actual production overhead/ Actual machine Hour
ii) Labour hour rate:- actual production overhead/ actual direct labour hours

Under and over absorption of overhead
If overhead absorbed exceeds the actual overhead the excess of absorbed overhead over the actual overhead is called over absorption of overhead as the amount charged to production has not been incurred

On the other hand when actual overhead is more than the overhead absorbed then the excess of actual overhead over absorption overhead is known as under absorption of overhead as this amount remains uncharged to production

Overabsorption takes place:

1. The total overhead incurred is less than the estimated or budgeted overhead
2. The output (or hours worked) are more than the estimate or budget.

Under absorption takes place when:

1. The total overhead incurred exceeds the estimated overhead

## COST AND MANAGEMENT ACCOUNTING -1

## SEMESTER 2

CBCS (H)
OVERHEAD ACCOUNTING
SECTION :2C
TEACHER: Prof Sunita Saha )SS
2. The output are less than the estimate or budget

## Situation 1: O/H recovered - O/H incurred= Positive value (it implies over absorption)

Situation 2: When, O/H Recovered- O/H incurred= Negative (it implies under absorption of $\mathrm{O} / \mathrm{H}$ )

Situation 3: When, $\mathbf{O} / \mathbf{H}$ Recovered- O/H incurred= Zero (it implies neither over absorption nor under absorption)

## Problem sums

## CU B.Com (H)

1. Calcutta engineering company has three production departments, $\mathrm{X}, \mathrm{Y}, \mathrm{Z}$ and one service department $S$, from the following particulars calculate the overhead to be allocated to departments X,Y,Z:

| Rent | 34,000 |
| :--- | :--- |
| Power | 18400 |
| Depreciation on machinery | 22,000 |
| Indirect wages | 5,300 |
| Canteen expenses | 5,700 |
| Electricity | 4,600 |

Further Information:

|  | X | Y | Z | S |
| :--- | :--- | :--- | :--- | :--- |
| Floor Space | 2000 | 3,000 | 2,500 | 1,000 |
| Light points | 18 | 12 | 10 | 6 |
| Cost of machine | 80,000 | 50,000 | 60,000 | 10,000 |
| Horse power ratio | 3 | 2 | 4 | 1 |
| No of workers | 7 | 5 | 5 | 2 |
| Direct Wages | 15,000 | 16,000 | 18,000 | 4,000 |

Service rendered by the service department are to be apportioned to the production departments as $\mathrm{X}=50 \%, \mathrm{Y}=25 \%, \mathrm{Z}=25 \%$

## 4. CU BCOM H 2008

A company has three production departments and two service departments. Fot the month of march 2008, the departmental expenses were as follows:

| Production department | Service department |
| :--- | :--- |
| A-10,000 | $\mathrm{X}-25,000$ |
| $\mathrm{~B}-15,000$ | $\mathrm{Y}-10,000$ |
| $\mathrm{C}-12,000$ |  |

The expenses of service departments are apportioned as follows:

| Particulars | A | B | C | X | Y |
| :--- | :--- | :--- | :--- | :--- | :--- |
| X | $40 \%$ | $30 \%$ | $20 \%$ | -- | $10 \%$ |
| Y | 30 | 40 | 10 | 20 | -- |

## Solution:

## Under Simultaneous equation method:

## Let $x=$ total overhead of $X$ department

## $Y=$ Total overhead of $Y$ department

COST AND MANAGEMENT ACCOUNTING -1
SEMESTER 2
CBCS (H)
OVERHEAD ACCOUNTING
SECTION :2C
TEACHER: Prof Sunita Saha )SS
Total overhead transferred to service department $X$ and $Y$ can be expressed as:
$X=\mathbf{2 5 , 0 0 0}+\mathbf{2 0} \%$ of $y$
$Y=10,000+10 \%$ of $X$
Or, $x=25,000+.20 y$
$Y=10,000+.10 x$

## Solving the simultaneous equation

$\mathbf{X}=\mathbf{2 7 , 5 5 1}$ and $\mathbf{Y}=\mathbf{1 2 , 7 5 5}$
Reapportionment will be
Secondary distribution

SECTION :2C
TEACHER: Prof Sunita Saha )SS
Factory rent, taxes, and insurance not traceable to department 25,000 . It has been decided that the costs of stores and maintenance can be equitably apportionment to the other departments on the basis of direct labour costs.

The machining department operated 40 hrs a week. There are five machines in the department and every machine remained idled for 80 hours during 2004 for holidays, repairs etc.

Calculate overhead absorption rate for machine department based on machine hours and overhead absorption rate for assembling department based on direct labour costs.

## Solutions

## Ultd

## Primary distribution

Allocation and apportionment of factory overhead costs to the production and service department

## CU BCOM ((H) 2004

7. The factory overhead cost of three productions departments of a company engaged in executing job orders for the accounting year for 2003-04 are as follows:

A-19,300, B-4,200, C-Rs 4800
Overhead has been applied as under:
Department A- Rs 1.50 per machine for 14,000 hours
B- Rs 1.30 per direct labour hours for 3,000 hours
C---80\% of direct labour cost of Rs6,000
Find out the amount of department wise under or over absorbed overhead and explain their treatment

| Department | Overhead |  | Under <br> absorption | Over <br> absorption | Net effect |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  | INCURRED | ABSORBED |  |  |  |
| A | 19,300 | 21,000 | ---- | 1,700 |  |
| B | 4,200 | 3,900 | 300 | --- |  |
| C | 4,800 | 4,800 | -- | --- |  |
| TOTAL | 28,300 | 29,700 | 300 | 1,700 | 1400 (over <br> absorbed) |

Working Notes:

## Overhead Absorbed:

A: $14,000 *$ Rs $1.50=21,000$ (absorbed on the basis of machine hours)
B: 3,000 *Rs $1.30=3900$ (absorbed on the basis of direct labour hours)
C: $6,000 * 80 \%=4800$ (absorbed on the basis of direct labour cost)

## Accounting Treatment of Overhead Absorption

COST AND MANAGEMENT ACCOUNTING -1
SEMESTER 2
CBCS (H)
OVERHEAD ACCOUNTING
SECTION :2C
TEACHER: Prof Sunita Saha )SS
Taking all department (A,B and C) together, overhead have been over absorbed by Rs1400(Net).
This amount will be credited to costing profits and loss account for the year 2003-2004
